

Evernic acid

Code No.: **BIA-E1676**

Pack sizes: **1 mg, 5 mg**

Synonyms :

Specifications

CAS #	: 537-09-7
Molecular Formula	: C ₁₇ H ₁₆ O ₇
Molecular Weight	: 332.3
Source	: <i>Evernic sp.</i>
Appearance	: White to off-white solid
Purity	: >95% by HPLC
Long Term Storage	: -20°C
Solubility	: Soluble in ethanol, methanol, DMF or DMSO.

Application Notes

Evernic acid is an orcinol depside found in *Evernia* species and is a major component of *Evernia prunastri* (oakmoss), an important lichen in the perfume industry. Like many lichen metabolites, evernic acid was isolated in the 19th century with its structure and synthesis resolved in the early part of the 20th century. Evernic acid is an important chemotaxonomic standard for lichens. Evernic acid has been examined in wide range of bioassays and has a diverse pharmacology with over 100 Scifinder citations up to 2017.
