

Meclocycline sulfosalicylate

Code No.: **BIA-M1465**

Pack sizes: **5 mg, 25 mg**

Synonyms :

Specifications

CAS #	: 73816-42-9
Molecular Formula	: C₂₉H₂₇ClN₂O₁₄S
Molecular Weight	: 695.1
Source	: Semi-synthetic
Appearance	: Yellow to orange solid
Purity	: >98% by HPLC
Long Term Storage	: -20°C
Solubility	: Soluble in ethanol, methanol, DMF or DMSO. Good water solubility.

Application Notes

Meclocycline sulfosalicylate is a salt prepared from demeclocycline taking advantage of the basic dimethylamino group which protonates and readily forms a salt in solution with 2-hydroxy-3-carboxybenzenesulphonic acid. Like all tetracyclines, meclocycline shows broad spectrum antibacterial and antiprotozoan activity and acts by binding to the 30S and 50S ribosomal sub-units, blocking protein synthesis. The unusual complex counter-ion is likely to add an antiseptic component to the use of the compound for skin infections.
