

α -Zearalenol

Code No.: **BIA-Z1141**

Pack sizes: **5 mg, 25 mg**

Synonyms : α -Zearalenol

Specifications

CAS #	: 36455-72-8
Molecular Formula	: C ₁₈ H ₂₄ O ₅
Molecular Weight	: 320.3
Source	: <i>Fusarium</i> sp.
Appearance	: White solid
Purity	: >99% by HPLC
Long Term Storage	: -20°C
Solubility	: Soluble in ethanol, methanol, DMF or DMSO. Limited water solubility.

Application Notes

α -Zearalenol is a mycotoxin produced by several species of *Fusarium*. α -Zearalenol exhibits pronounced estrogenic activity, being 3-fold more active than zearalenone. Contamination of grains, notably maize, by *Fusarium* species gives rise to high levels of zearalenol and is regarded as an important food quality issue for both human and animal health.
