

Calphostin C

Code: **BIA-C1014**

Pack sizes: **0.1 mg, 0.5 mg**

Synonyms : **Antibiotic UCN 1028 C, UCN-1028 C**

Specifications

CAS # : **121263-19-2**
Molecular Formula : **C₄₄H₃₈O₁₄**
Molecular Weight : **790.8**
Source : ***Cladosporium cladosporioides* MST-FP1798**
Appearance : **Dark red solid**
Purity : **> 95% by HPLC**
Long Term Storage : **+4°C, light sensitive**
Solubility : **Soluble in ethanol, methanol, DMF or DMSO**

Application Notes

Calphostin C is a perylenequinone isolated from the fungus, *Cladosporium cladosporioides*. It is a potent and specific inhibitor of protein kinase C, with inhibition being light dependent. Calphostin C has also been shown to inhibit cell proliferation and induce apoptosis *in vitro*.
