

## Cytochalasin J

Code: **BIA-C1024**

Pack sizes: **1.0 mg, 5.0 mg**

Synonyms : **Kodocytochalasin 2, Paspalin P11, Deacetylcytochalasin H, 17-Deoxy-zygospurin D**

## Specifications

CAS # : **56144-22-0**  
Molecular Formula : **C<sub>28</sub>H<sub>37</sub>NO<sub>4</sub>**  
Molecular Weight : **451.6**  
Source : ***Phomopsis* sp. MST-FP1655**  
Appearance : **White solid**  
Purity : **> 95% by HPLC**  
Long Term Storage : **-20°C**  
Solubility : **Soluble in ethanol, methanol, DMF or DMSO.**

## Application Notes

Cytochalasin J is one of a family of potent mycotoxins produced by a range of fungi. All members of the cytochalasin class exhibit profound effects on cytoskeletal proteins which give rise to pronounced morphogenic activity in animals and plants. Cytochalasin J is the deacetyl analogue of cytochalasin H and exhibits similar, though less potent, antibacterial, antifungal, nematocidal and antitumor activities.
