

Mutilin

Code: **BIA-M1333**

Pack sizes: **1 mg, 5 mg**

Synonyms : -

Specifications

CAS #	: 6040-37-5
Molecular Formula	: C₂₀H₃₂O₃
Molecular Weight	: 320.5
Source	: Semi-synthetic
Appearance	: White solid
Purity	: >99%
Storage	: -20°C
Solubility	: Soluble in ethanol, methanol, DMF or DMSO. Partial water solubility.

Application Notes

Mutilin is minor metabolite of the pleuromutilin family originally isolated from *Pleurotus mutilus*. Mutilin is formed by hydrolysis of the hydroxyacetyl ester of pleuromutilin, and is a degradation product and *in vivo* metabolite of pleuromutilin. Interest in mutilin has focused on its potential as a substrate for the generation of unique metabolites via biosynthesis to provide a broader range of targets for semi-synthetic modification.
